

VoiceAnnounce[®] 9900CW

Caller ID with Call Waiting & Name Announce

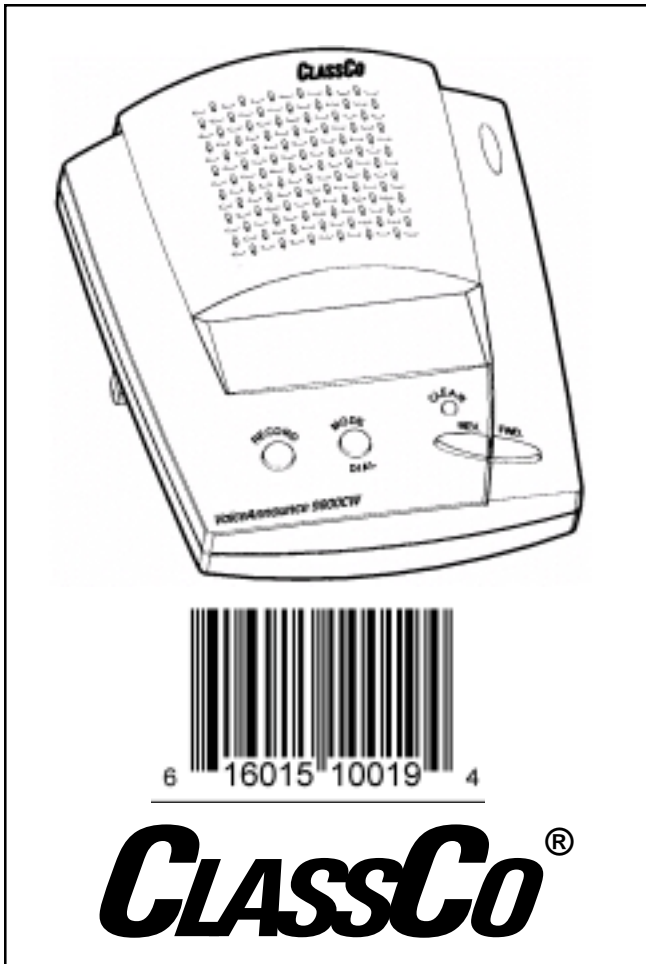

Welcome to VoiceAnnounce caller ID, the new generation of telecom products. ClassCo's 9900CW uses patented VoiceAnnounce technology to announce calls over its built-in speaker, or over the handset of a cordless phone, a headset, or a speakerphone. This technological breakthrough gives caller ID subscribers what they have been looking for: the ability to screen calls without the interruptions and inconvenience imposed by traditional, display-only caller ID equipment. The ultimate in caller ID products, the VoiceAnnounce 9900CW is an enhancement to caller ID, call-waiting ID, and voice messaging services.

Features

- Announces caller's 10-digit telephone number or recorded name
- Announces "number unknown" and "number blocked" for unknown and blocked calls
- Easy "one-touch" name recording for up to 50 callers
- Stores 99 most recent calls for visual & audible review
- Easy-to-read 3-line LCD displays name, number, date and time of each call
- Call-waiting ID compatible (type-2)
- Visual and audible message waiting indicator (FSK and stuttered dial tone compatible)
- Dial back
- Announce caller's name or number over built-in speaker or cordless handset or headset
- Records and delivers custom outgoing messages to specific callers
- Multi-function LED for indicating new calls, message waiting, ringing, and extension in-use
- One-touch audible review for "new" calls
- New call indicator on call summary display
- Repeat call indicator
- Adjustable volume control (high, medium, low, off)
- Bi-lingual Display and Announcements (English and Spanish)
- Automatic memory backup
- AC power adapter included
- Optional battery power
- 1-Year Limited Warranty
- Meets FCC, IC, UL, and CSA requirements

*US Patents 5,526,406 and 6,038,443. Other patents pending.
Requires subscription to appropriate telecommunications services.*
